

## Appendix A

### BIBLIOGRAPHY

#### THE BIOMEDICAL PUBLICATIONS OF DR. RAOUL E. BENVENISTE

1. Davies, J., Benveniste, R., Kvitek, K., Ozanne, B., and Yamada, T.: Aminoglycosides: biologic effects of molecular manipulation. *J. Infect. Dis.* 119: 351-354, 1969.
2. Ozanne, B., Benveniste, R., Tipper, D., and Davies, J.: Aminoglycoside antibiotics: inactivation by phosphorylation in *Escherichia coli* carrying R-factors. *J. Bact.* 100: 1144-1146, 1969.
3. Benveniste, R., Yamada, T., and Davies, J.: Enzymatic adenylylation of streptomycin and spectinomycin by R-factor resistant *Escherichia coli*. *Infect. Immun.* 1: 109-119, 1970.
4. Benveniste, R. and Davies, J.: The enzymatic acetylation of aminoglycoside antibiotics by *Escherichia coli* carrying an R-factor. *Biochem.* 10: 1787-1796, 1971.
5. Benveniste, R. and Davies, J.: R-factor mediated gentamicin resistance: A new enzyme which modifies aminoglycoside antibiotics. *FEBS Lett.* 14: 293-296, 1971.
6. Davies, J., Brzezinska, M., and Benveniste, R.: Biochemical mechanism of resistance to aminoglycoside antibiotics. *Ann. N. Y. Acad. Sci.* 182: 226-233, 1971.
7. Brzezinska, M., Benveniste, R., Davies, J., Daniels, P. J. L., and Weinstein, J.: Gentamicin resistance in strains of *Pseudomonas aeruginosa* mediated by enzymatic N-acetylation of the deoxystreptamine moiety. *Biochem.* 11: 761-766, 1972.
8. Benveniste, R. and Scolnick, E.: RNA in mammalian sarcoma virus transformed nonproducer cells homologous to murine leukemia virus RNA. *Virology* 51: 370-382, 1973.
9. Scolnick, E., Benveniste, R., and Parks, W.: Purification by oligo-(dT)-cellulose of viral specific RNA from sarcoma virus transformed mammalian nonproducer cells. *J. Virology* 11: 600-602, 1973.
10. Parks, W. P., Livingston, D. M., Todaro, G. J., Benveniste, R., and Scolnick, E. M.: Radioimmunoassay of mammalian type C viral proteins. III. Detection of viral antigen in normal murine cells and tissues. *J. Exp. Med.* 137: 622-635, 1973.
11. Benveniste, R. and Davies, J.: Aminoglycoside antibiotic inactivating enzymes in actinomycetes similar to those present in clinical isolates of antibiotic-resistant bacteria. *Proc. Natl. Acad. Sci. USA* 70: 2276-2280, 1973.

12. Benveniste, R. and Davies, J.: Structure-activity relationships among the aminoglycoside antibiotics: role of hydroxyl and amino groups. *Antimicrob. Agents Chemother.* 4: 402-409, 1973.
13. Todaro, G. J., Benveniste, R. E., Lieber, M. M., and Livingston, D. M.: Infectious type C viruses released by normal cat embryo cells. *Virology* 55: 506-515, 1973.
14. Benveniste, R. E., Todaro, G. J., Scolnick, E. M., and Parks, W. P.: Partial transcription of the murine type C viral genome in various BALB/c cell lines. *J. Virol.* 12: 711-720, 1973.
15. Lieber, M. M., Benveniste, R. E., Livingston, D. M., and Todaro, G. J.: Mammalian cells in culture frequently release type C viruses. *Science* 182: 56-59, 1973.
16. Benveniste, R. E. and Todaro, G. J.: Homology between type C viruses of various species as determined by molecular hybridization. *Proc. Natl. Acad. Sci. USA* 70: 3316-3320, 1973.
17. Benveniste, R. and Davies, J.: Mechanisms of antibiotic resistance in bacteria. In Snell, E. E., Boyer, P. D., Meister, A., and Richardson, C. C. (Eds.): *Annual Review of Biochemistry*, Vol. 42. Palo Alto, Annual Reviews, 1973, pp. 471-506.
18. Benveniste, R. E., Lieber, M. M., and Todaro, G. J.: A distinct class of inducible murine type C viruses replicates in the rabbit SIRC cell line. *Proc. Natl. Acad. Sci. USA* 71: 602-606, 1974.
19. Todaro, G. J., Benveniste, R. E., Lieber, M. M., and Sherr, C. J.: Characterization of a type C virus released from the porcine cell line PK(15). *Virology* 58: 65-74, 1974.
20. Benveniste, R. E., Lieber, M. M., Livingston, D. M., Sherr, C. J., Todaro, G. J., and Kalter, S. S.: Infectious type C virus isolated from a baboon placenta. *Nature* 248: 17-20, 1974.
21. Sherr, C. J., Lieber, M. M., Benveniste, R. E., and Todaro, G. J.: Endogenous baboon type C virus (M7): biochemical and immunological characterization. *Virology* 58: 492-503, 1974.
22. Todaro, G. J., Sherr, C. J., Benveniste, R. E., Lieber, M. M., and Melnick, J. M.: Type C viruses of baboons: isolation from normal cell cultures. *Cell* 2: 55-61, 1974.
23. Davies, J. E. and Benveniste, R. E.: Enzymes that inactivate antibiotics in transit to their targets. *Ann. N. Y. Acad. Sci.* 235: 130-136, 1974.

24. Benveniste, R. E., Heinemann, R., Wilson, G. L., Callahan, R., and Todaro, G. J.: Detection of baboon type C viral sequences in various primate tissues by molecular hybridization. *J. Virol.* 14: 56-67, 1974.
25. Sherr, C. J., Benveniste, R. E., and Todaro, G. J.: Type C viral expression in primate tissues. *Proc. Natl. Acad. Sci. USA* 71: 3721-3725, 1974.
26. Benveniste, R. E. and Todaro, G. J.: Multiple divergent copies of endogenous C-type virogenes in mammalian cells. *Nature* 252: 170-173, 1974.
27. Benveniste, R. E. and Todaro, G. J.: Evolution of type C viral genes. I. Nucleic acid from baboon type C virus as a measure of divergence among primate species. *Proc. Natl. Acad. Sci. USA* 71: 4513-4518, 1974.
28. Benveniste, R. E. and Todaro, G. J.: Evolution of C-type viral genes: II. Inheritance of exogenously acquired viral genes. *Nature* 252: 456-459, 1974.
29. Callahan, R., Benveniste, R. E., Lieber, M. M., and Todaro, G. J.: Nucleic acid homology of murine type-C viral genes. *J. Virol.* 14: 1394-1403, 1974.
30. Todaro, G. J., Benveniste, R. E., Callahan, R., Lieber, M. M., and Sherr, C. J.: Endogenous primate and feline type C viruses. In Ford, N., Jarovski, S., and Zaninozic, A. (Eds.): *Cold Spring Harbor Symposium on Quantitative Biology*, Vol. XXXIX. The Tumor Viruses. New York, Cold Spring Harbor Laboratory Press, 1974, pp. 1159-1168.
31. Lieber, M. M., Benveniste, R. E., Sherr, C. J., and Todaro, G. J.: Isolation of a type C virus (FS-1) from the European wildcat (*Felis sylvestris*). *Virology* 66: 117-127, 1975.
32. Sherr, C. J., Fedele, L. A., Benveniste, R. E., and Todaro, G. J.: Interspecies antigenic determinants of the reverse transcriptases and p30 proteins of mammalian type C viruses. *J. Virol.* 15: 1440-1448, 1975.
33. Todaro, G. J., Lieber, M. M., Benveniste, R. E., Sherr, C. J., Gibbs, C. J., Jr., and Gajdusek, D. C.: Infectious primate type C viruses: three isolates belonging to a new subgroup from the brains of normal gibbons. *Virology* 67: 335-343, 1975.
34. Lieber, M. M., Sherr, C. J., Benveniste, R. E., and Todaro, G. J.: Biologic and immunologic properties of porcine type C viruses. *Virology* 66: 616-619, 1975.
35. Lieber, M. M., Sherr, C. J., Todaro, G. J., Benveniste, R. E., Callahan, R., and Coon, H. G.: Isolation from the Asian mouse *Mus caroli* of an endogenous type C virus related to infectious primate type C viruses. *Proc. Natl. Acad. Sci. USA* 72: 2315-2319, 1975.

36. Benveniste, R. E. and Todaro, G. J.: Segregation of RD-114 and FeLV related sequences in crosses between domestic cat and leopard cat. *Nature* 257: 506-508, 1975.
37. Benveniste, R. E., Sherr, C. J., and Todaro, G. J.: Evolution of type C viral genes: origin of feline leukemia virus. *Science* 190: 886-888, 1975.
38. Benveniste, R. E. and Todaro, G. J.: Evolution of type C viral genes. III. Preservation of ancestral murine type C viral sequences in pig cellular DNA. *Proc. Natl. Acad. Sci. USA* 72: 4090-4094, 1975.
39. Benveniste, R. E., Sherr, C. J., Lieber, M. M., Callahan, R., and Todaro, J. G.: Evolution of primate type C viral genes. In Gottlieb, A., Plescia, O. J., and Bishop, D. H. L. (Eds.): *Fundamental Aspects of Neoplasia*. New York, Springer-Verlag, 1975, pp. 29-53.
40. Benveniste, R. E. and Todaro, G. J.: Evolution of type C viral genes: evidence for an Asian origin of man. *Nature* 261: 101-108, 1976.
41. Todaro, G. J., Sherr, C. J., and Benveniste, R. E.: Baboons and their close relatives are unusual among primates in their ability to release nondefective endogenous type C viruses. *Virology* 72: 278-282, 1976.
42. Sherr, C. J., Benveniste, R. E., Lieber, M. M., and Todaro, G. J.: Type C viruses from Kirsten sarcoma-transformed mink cells co-cultivated with primate cells and expressing p30 antigens related to feline leukemia virus. *J. Virol.* 19: 346-358, 1976.
43. Callahan, R., Benveniste, R. E., Sherr, C. J., Schidlovsky, G., and Todaro, G. J.: A new class of genetically transmitted retrovirus isolated from *Mus cervicolor*. *Proc. Natl. Acad. Sci. USA* 73: 3579-3583, 1976.
44. Todaro, G. J., Benveniste, R. E., Sherr, C. J., Lieber, M. M., and Callahan, R.: Infectious primate type C viral group: evidence for an origin from an endogenous virus of the rodent *Mus caroli*. In Clemmesen, J. and Yohn, D. S. (Eds.): *Comparative Leukemia Research 1975 (Bibliotheca Haematologica)* No. 43. Basel, Karger/Basel, 1976, pp. 115-120.
45. Todaro, G. J., Benveniste, R. E., and Sherr, C. J.: Interspecies transfer of RNA tumor virus genes: implications for the search for "human" type C viruses. In Baltimore, D., Huang, A. S., and Fox, C. F. (Eds.): *Animal Virology. ICN-UCLA Symposia on Molecular and Cellular Biology*, Vol. 4. New York, Academic Press, 1976, pp. 369-384.
46. Benveniste, R. E., Callahan, R., Sherr, C. J., Chapman, V., and Todaro, G. J.: Two distinct endogenous type C viruses isolated from the Asian rodent *Mus cervicolor*: conservation of virogene sequences in related rodent species. *J. Virol.* 21: 849-862, 1977.

47. Benveniste, R. E. and Todaro, G. J.: Evolution of primate oncornaviruses: an endogenous virus from langurs (*Presbytis* spp.) with related virogene sequences in other Old World monkeys. *Proc. Natl. Acad. Sci. USA* 74: 4557-4561, 1977.
48. Todaro, G. J., Benveniste, R. E., Sherr, C. J., Schlom, J., Schidlovsky, G., and Stephenson, J.: Isolation and characterization of a new type D retrovirus from the Asian primate, *Presbytis obscurus* (Spectacled langur). *Virology* 84: 189-194, 1978.
49. Sherr, C. J., Benveniste, R. E., and Todaro, G. J.: Endogenous mink (*Mustela vison*) type C virus isolated from sarcoma virus-transformed mink cells. *J. Virol.* 25: 738-749, 1978.
50. Todaro, G. J., Benveniste, R. E., Sherwin, S. A., and Sherr, C. J.: MAC-1, a new genetically transmitted type C virus of primates: "low-frequency" activation from stump-tail monkey cell cultures. *Cell* 13: 775-782, 1978.
51. Sherwin, S. A., Benveniste, R. E., and Todaro, G. J.: Complement-mediated lysis of type C viruses: effect of primate and human sera on various retroviruses. *Int. J. Cancer* 21: 6-11, 1978.
52. Sherwin, S. A., Rapp, U. R., Benveniste, R. E., Sen, A., and Todaro, G. J.: The rescue of endogenous 30S retroviral sequences from mouse cells by baboon type C virus. *J. Virol.* 26: 257-264, 1978.
53. Benveniste, R. E., Wilson, G. L., and Todaro, G. J.: Skunks have gene sequences in their cellular DNA related to squirrel monkey retrovirus: transmission between species of a New World primate endogenous type D retrovirus. *Biochem. Biophys. Res. Comm.* 81: 1363-1369, 1978.
